REVISION LEDGER

Rev. No.	Section No.	Page(s)	Revision Outline
2	All	All	Change Issue No. to Revision No.
	Approved	Cover	Change Management Representative to Laboratory Manager
3	All	All	Change Revision No. from 2 to 3
	C.2	5	Add Technical Director
	C.2.3.1	5	Add Senior Technical Manager
	C.3	6	Add Senior Technical Manager
	C.3.2.1	7	Add Technical Director
	C.3.3.1	7	Add Project Manager
	C.4.1.2	8	Add requirements of Approved Signatory for Rock Testing
	C.5	9	Add Project Manager
	C.5.2.1	9	Add Senior Technical Manager
	C.8.4.9	13	Additional responsibility of ILC organizer
	C.8.5.4	14	Additional training requirement of ILC organizer
	C.8.6.4	14	Additional technical requirement of ILC organizer
	C.8.7.3	14	Additional skill of ILC organizer
4	All	All	Change Revision No. from 3 to 4
	C.3	6 - 7	Separate Technical Director from Laboratory Manager

Job Descriptions and Competence Requirements

1. Management Representative

1.1. Academic, Qualification and working experience

1.1.1. Appointed by the Board of Directors and responsible for implementing the Laboratory policy pertaining to quality assurance and control; and

1.1.2. The Management Representative shall have knowledge in the laboratory operation and basic training in ISO/IEC 17025 and at a managerial position for at least 10 years.

1.2. Report to

1.2.1. The Board of Directors of Mother Company.

1.3. Subordinate

1.3.1. All Laboratory personnel.

1.4. Responsibility

1.4.1. Formulate the quality policy statement and approval of the Quality Manual;

1.4.2. Formulate the impartiality policy and related procedures for prevention of risks to impartiality;

1.4.3. Decide disciplinary actions to personnel violating the laboratory's code of conduct;

1.4.4. Commit and provide adequate resources to development and implementation and to continually improve the quality management system;

1.4.5. Communicate to the organization the importance of meeting customer requirements as well as statutory and regulatory requirements;

1.4.6. Attend management review meeting; and

1.4.7. Review audit reports and findings.

1.5. Training requirements

1.5.1. General knowledge on ISO/IEC 17025; and

1.5.2. Code of conduct.

1.6. Technical knowledge requirements

1.6.1. General knowledge on nature of activities performed in the laboratory; and

1.6.2. Updated regulatory requirements of activities within the laboratory.

1.7. Skill

1.7.1. Input creative and innovative ideas in improving the quality system and expansion of services;

1.7.2. Listen attentively to opinions of staff and resolve conflicts tactically;

1.7.3. Communicate effectively with customers in clarification and promotion of services; and staff of the Company in ensuring smooth operation of the Company; and

1.7.4. Identify strength of staff in ensuring they are posted in appropriate work.

2. Laboratory Manager

2.1. Academic, Qualification and working experience

2.1.1. Degree in Engineering (Civil or Geotechnical) and at least 15 years of relevant working experience.

2.2. Report to

2.2.1. Management Representative.

2.3. Subordinate

2.3.1. Senior Technical Manager and below.

2.4. Responsibility

2.4.1. Act as the Laboratory's authorized representative for all accreditations;

2.4.2. Recommend appropriate senior staff on improvements required in specific aspects of the Laboratory operations and/or policies;

2.4.3. Ensure the technical competence of the company;

2.4.4. Recommend to the Management Representative regarding staffing requirements;

2.4.5. Carry out investigations on technical complaints and non-conforming work of exceptional seriousness;

2.4.6. Appoint senior staff and authorization of technical personnel in performing specific tasks;

2.4.7. Business development, especially in the aspect of feasible expansion of area of activities;

2.4.8. Arbitrate between senior staff members when conflict arises pertaining to the Laboratory operations and quality systems;

2.4.9. Review new job tenders for technical staffing and equipment requirements; and

2.4.10. Notify customers of all matters affecting the validity of the test/calibration results and recall reports.

2.5. Training requirements

2.5.1. Code of conduct;

2.5.2. Detail requirements of ISO/IEC 17025;

2.5.3. HKAS regulations, HOKLAS Supplementary Criteria;

2.5.4. Measurement uncertainty;

2.5.5. Method development and validation requirements; and

2.5.6. Safety.

2.6. Technical knowledge requirements (extensive knowledge)

2.6.1. Principle, limitations and application of the methods under their responsibility;

2.6.2. Principle, limitations, operation, calibration and check requirements of equipment under their responsibility;

2.6.3. Latest regulatory requirements and development including standard and technology of the activities under their responsibility;

2.6.4. Reporting and quality control check of the methods under their responsibility; and

2.6.5. Analysis of proficiency testing activities.

2.7. Skill

2.7.1. Identify strength of staff and maximize utilization of available resources in ensuring smooth operation;

2.7.2. Analyze and identify questionable results and then subsequent problem resolution;

2.7.3. Proficiency in both Chinese and English languages to study standards and prepare step by step method manual clearly and thoroughly in ensuring consistent operation;

2.7.4. Use in computer and develop excel for estimation of measurement uncertainty; and

2.7.5. Take initiative in method development, improving and reviewing existing method and workflow.

3. <u>Technical Director</u>

3.1. Academic, Qualification and working experience

Same as Laboratory Manager

3.2. Report to

3.2.1. Management Representative.

3.3. Subordinate

3.3.1. Laboratory Manager and below.

3.4. Responsibilities

3.4.1. Ensure the technical competence of the company;

3.4.2. Recommend to the Management Representative regarding development of new technology and test areas;

3.4.3. Assist the Laboratory Manager in investigations on technical complaints and non-conforming work of exceptional seriousness; and

3.4.4. Review new job tenders for technical staffing and equipment requirements.

3.5. Training requirements

3.5.1. Same as Laboratory Manager (C.2.5).

3.6. Technical knowledge requirements (extensive knowledge)

3.6.1. Same as Laboratory Manager (C.2.6).

3.7. Skill

3.7.1. Same as Laboratory Manage (C.2.7).

4. <u>Senior Technical Manager</u>

4.1. Qualification and working experience

4.1.1. Degree in Engineering (Civil or Geotechnical) or equivalent professional qualification and at least 10 years of relevant working experience.

4.2. Report to

4.2.1. Laboratory Manager

4.3. Subordinate

4.3.1. Project Manager, Senior Engineer and junior ranks.

4.4. Responsibilities

4.4.1. Ensure the technical competence of the company;

4.4.2. Assist the Laboratory Manager / Technical Director in review of new job tenders for technical staffing and equipment requirements;

4.4.3. Manage the day-to-day technical activities of the Laboratory;

4.4.4. Implement the Laboratory policies in both administrative and quality assurance aspects;

4.4.5. Provide training, skills development and proficiency assessment of all the technical staff;

4.4.6. Develop, review and compile all technical procedures in accordance with the appropriate standards;

4.4.7. Ensure that in-house and standard laboratory activities are adequately validated or verified in compliance with customer's specifications and/or the relevant standards;

4.4.8. Recommend corrective actions arising from audits, assessment, proficiency testing and complaints; and

4.4.9. Advise the Project Manager, Senior Engineer or below on the allocation of operators to each jobsite to avoid improper influence and to prevent from engagement in activities that may diminish the competence, integrity and impartiality in judgment as far the Laboratory's quality of service is concerned.

4.5. Training requirements

4.5.1. Same as Laboratory Manager (C.2.5).

4.6. Technical knowledge requirements

4.6.1. Same as Laboratory Manager (C.2.6).

4.7. Skill

4.7.1. Same as Laboratory Manager (C.2.7).

5. HOKLAS Approved Signatory

5.1. Qualification and working experience

5.1.1. Foundation testing

a) Degree in Civil Engineering and at least 4 years of working experience in foundation testing; or

b) Higher Diploma in Civil Engineering and at least 8 years of working experience in foundation testing.

5.1.2. Rock testing

a) Corporate Member of the Hong Kong Institution of Engineers (Civil or Geotechnical Discipline), or an equivalent professional qualification, and has at least one year of experience in supervising relevant rock tests;

b) A degree in Engineering, or an equivalent higher academic qualification conferred by a recognized university, and has a minimum of five years of post-qualification civil or geotechnical engineering experienced, with at least one year of experience in supervising relevant rock tests;

c) Higher Diploma in Civil Engineering, or an equivalent academic qualification conferred by a recognized higher education institution, an has at least seven years post-qualification experience in construction material testing, including two years in supervising relevant rock tests;

d) Completion of a learning programme recognized under Hong Kong Qualifications Framework and at least seven years post-qualification experience in construction material testing, including two years in supervising relevant rock tests; and

e) Level 2 or above in five subjects including Physics and Mathematics in the Hong Kong Diploma of Secondary Education (HKDSE), or equivalent, and have a minimum of ten years of post-qualification experience in construction material testing, with at least two years in the relevant types of rock tests, one year of which shall be in a supervisory role.

5.2. Report to

5.2.1. Next higher rank.

5.3. Subordinate

5.3.1. Next junior rank.

5.4. Approval of Approved Signatory

5.4.1. By HKAS.

5.5. Responsibilities

5.5.1. Same as Senior Technical Manager (C.3.4).

5.6. Training requirements

5.6.1. Same as Laboratory Manager / Technical Director (C.2.5).

5.7. Technical knowledge requirements

5.7.1. Same as Laboratory Manager / Technical Director (C.2.6).

5.8. Skill

5.8.1. Same as Laboratory Manager / Technical Director (C.2.7).

6. Project Manager / Senior Engineer / Engineer

6.1. Qualification and working experience

6.1.1. Project Manager / Senior Engineer should possess a degree in Engineering (Civil or Geotechnical) or equivalent with at least 5 years of relevant working experience while Engineer should have Higher Diploma in engineering or equivalent and at least 2 year of relevant working experience.

6.2. Report to

6.2.1. Senior Technical Manager / Project Manager.

6.3. Subordinate

6.3.1. Senior Engineer / Senior Technician and Technician.

6.4. Responsibilities

6.4.1. Assist the Senior Technical Manager / Project Manager for the arrangement of the day-to-day technical activities in the most efficient and expeditious manner;

6.4.2. Assist the Senior Technical Manager / Project Manager in training of subordinate and assessment of subordinate's performance;

6.4.3. Direct supervise the staff members under their line of authority to ensure that the laboratory activities are carried out are in accordance with the relevant standard and that they are carried out in a reasonable amount of time;

6.4.4. Promptly notify the Senior Technical Manager when an anticipated workload needs extra manpower and equipment to avoid delays in the delivery of services;

6.4.5. Notify the Senior Technical Manager whenever equipment is deemed not giving

reliable results;

6.4.6. Allocate appropriate operators for the respective method required on site;

6.4.7. Ensure that all equipment are properly calibrated and maintained; and/or certified reference materials and reference materials are properly maintained, stored and verified within the stated period of validity;

6.4.8. Ensure that copies of manufacturer's equipment operating and maintenance instructions, including the respective current calibration certificates are kept in the designated location and available at all times for easy reference;

6.4.9. Ensure that quality control checks in relation of test/calibration or equipment are carried out at a specified frequency and results are within control;

6.4.10. Ensure that worksheets and reports are prepared; and

6.4.11. Acquire appropriate safety equipment necessary to be provided to operators.

6.5. Training requirements

6.5.1. Same as Senior Technical Manager (C.3.5).

6.6. Technical knowledge requirements

6.6.1. Same as Senior Technical Manager (C.3.6).

6.7. Skill

6.7.1. Analytical skill in identification of questionable results and problem resolution;

6.7.2. Proficiency in both Chinese and English languages to study standards and prepare step by step method manual clearly and thoroughly in ensuring consistent operation; and

6.7.3. Take initiative in method development, improving and reviewing existing method and workflow.

7. Senior Technician / Technician

7.1. Qualification and working experience

7.1.1. Form 5 at least 3 years working experience for Senior Technician and no working experience for technician.

7.2. Report to

7.2.1. Engineer.

7.3. Subordinate

7.3.1. Not applicable.

7.4. Responsibilities

7.4.1. Carry out the tests/calibrations in accordance with appropriate standards and customer specification;

7.4.2. Carry out necessary calibrations and maintenance of their respective equipment at the required interval, under the guidance of Engineer;

7.4.3. Record test/calibration result and prepare respective worksheets;

7.4.4. Notify the Project Manager, Senior Engineer or Engineer of any equipment that are deemed not giving reliable result or information;

7.4.5. Ensure that their respective equipment is kept in a clean tidy and usable condition; and

7.4.6. Ensure that all consumables of critical value kept and secured from contamination and hazard.

7.5. Training requirements

7.5.1. Code of conduct;

7.5.2. Basic requirements of ISO/IEC 17025 and documented quality management system;

7.5.3. On-the-job training in technical methods; and

7.5.4. Safety.

7.6. Technical knowledge requirements

7.6.1. Basic principle, limitations and application of the methods;

7.6.2. Basic principle, limitations, operation, calibration and check requirements of equipment used for the laboratory activities responsible; and

7.6.3. Check as documented in the methods.

7.7. Skill

7.7.1. Time control in discharging the work for fulfillment of the agreed turnaround time;

7.7.2. Carry out the work tidily and orderly;

7.7.3. Use of computer in generation of quality record and simple data manipulation;

7.7.4. Record data clearly and proper handwriting to avoid misunderstanding;

7.7.5. Communicate effectively with personnel at customers' site; and

7.7.6. Self-motivate and make decision firmly regarding suitability of environment and sudden change.

8. Qualified Operator

8.1. Qualification and working experience

8.1.1. Foundation tests

Holder of a technician certificate or equivalent qualification issued by a recognized technical institute and having 2 years of relevant experience.

8.1.2. Rock tests

Senior technician or above.

8.2. Report to

8.2.1. Next higher rank.

8.3. Subordinate

8.3.1. Next lower rank.

8.4. Responsibilities

8.4.1. Carry out the on-site tests;

8.4.2. Be responsible for the validity of tests conducted; and

8.4.3. Carry out the duties of senior technician/technician.

8.5. Training requirements

8.5.1. Same as Senior technician/technician (C.6.5).

8.6. Technical knowledge requirements

8.6.1. Same as Senior technician/technician (C.6.6).

8.7. Skill

8.7.1. Same as Senior technician/technician (C.6.7).

9. Quality Manager / Interlaboratory Comparison Organizer

9.1. Qualification and working experience

9.1.1. Degree holder preferably in science subject and at least 2 years of working experience.

9.2. Report to

9.2.1. Management Representative.

9.3. Subordinate

9.3.1. Quality Officer.

9.4. Responsibility

9.4.1. Report directly to the Management Representative on quality assurance issues;

9.4.2. Prepare Quality Manual and related quality standard procedures;

9.4.3. Participate in review of the quality manual and compliance with ISO/IEC 17025 and HKAS requirements and when necessary, updating of respective quality system documents;

9.4.4. Organize internal audit for ensuring effective implementation and suggestions for improvement of the system;

9.4.5. Identify deviations from the management system or from the procedures for performing laboratory activities and initiation of actions to prevent or minimize such deviations;

9.4.6. Carry out investigations on quality complaints;

9.4.7. Supervise Quality Officer in discharging the duties;

9.4.8. Raise quality awareness within the Laboratory by providing regular training and lecture to all staff members in quality related topics including Code of Conduct; and

9.4.9. Plan and organize interlaboratory comparison study (ILC) and related ILC plan, statistical evaluation and report preparation.

9.5. Training requirements

9.5.1. Detail requirements of ISO/IEC 17025;

9.5.2. HKAS Regulations, HOKLAS and HKIAS Supplementary Criteria;

9.5.3. Code of conduct; and

9.5.4. Overview of ISO 17043 and related statistics.

9.6. Technical requirements

9.6.1. Basic knowledge of activities performed in the laboratory;

9.6.2. Basic knowledge of calibration/performance check requirements;

9.6.3. Basic knowledge of quality control checks; and

9.6.4. Basic knowledge of organization of interlaboratory comparison study.

9.7. Skill (able to)

9.7.1. Supervise subordinate, train and lead team of internal auditors;

9.7.2. Communicate effectively with colleagues, HKAS officers and assessors;

9.7.3. Proficient in English in replying non-conformities, preparation of interlaboratory comparison plan and report; and preparation of quality documents clearly and in detail in ensuring consistent operation;

9.7.4. Analytical sense in identification of problems in ILC and related causes; and

9.7.5. Keep track of new development in international standard for operation of laboratory and accreditation criteria.

10. Quality Officer

10.1. Qualification and working experience

10.1.1. Degree holder and at least 1 year of working experience.

10.2. Report to

10.2.1. Quality Manager.

10.3. Subordinate

10.3.1. NIL.

10.4. Responsibility

10.4.1. Assist the Quality Manager in maintaining and implementing the quality system;

10.4.2. Take up the role as Document Coordinator responsible for

(a) Preparation of documents in standard format;

(b) Assign document code;

(c) Upload latest electronic documents to intranet;

(d) Maintenance of a copy of obsolete documents as track record; and

(e) Preparation of master lists.

10.5. Training requirements

10.5.1. General knowledge of ISO/IEC 17025 and documented quality management system;

10.5.2. Details of document and record control QSP02 and QSP07; and

10.5.3. Code of conduct.

10.6. Technical knowledge requirements

10.6.1. Basic knowledge of types of activities performed in the laboratory.

10.7. Skill

10.7.1. Communicate effectively with colleagues, HKAS officers and assessors; and

10.7.2. Proficient in use of computer for maintaining quality records and lists.

11. Vacant Post

11.1. Whenever there are vacant posts, the duties of the corresponding posts will be taken up by the person in the next senior rank.
